

At a glance: Foxi and digital portfolio

What is a digital portfolio?

A digital portfolio is the updated version of a regular portfolio. A **major advantage** over analog portfolios is the possibility to **include videos and audio files** and **share** them **effortlessly** with parents. This gives a more complete overview over a child's progress in early years.

What is Foxi?

Foxi is the companion app to KidsFox and SchoolFox. It is specifically designed for **children** so they are **able to take pictures and videos by themselves** with their kindergarten group tablet.

Why use Foxi and a digital portfolio?

While regular portfolios help students learn and experience creating with their hands, using Foxi adds a meta-level of learning. The student doesn't only learn to create their work, but is also empowered to **actively select, modify and compose its own portfolio**.

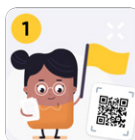

Share a students' learning progress effortlessly **with parents, other teachers or even schools**.

And the best part about a digital portfolio? Nothing gets broken. Nothing gets lost. Nothing ages. Nothing but popping colours, even years after creation.

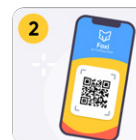

How much does Foxi cost?

If you **contact us before August 31st 2022**, you get **one year of portfolio for free**.

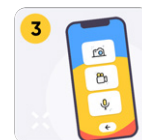

The basic price for Foxi + portfolio is **100€ + 0,25€ per student** (additionally to the price of our **MAX rate**)

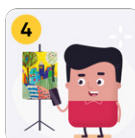

Teachers hand out the personal QR codes

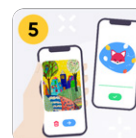

Children open the Foxi app & scan the QR code

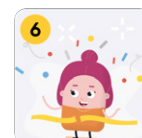

Children choose whether to create a video, photo or audio document

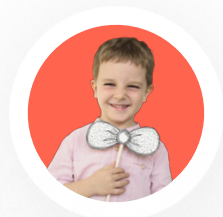

Record video, photo or audio document for portfolio contribution

Teachers review, decide and upload video, photo or audio file

Celebrate learning progress together!
