Welcome to **SchoolFox**
– Simplifying school communication!

Thanks to **SchoolFox**, you will be kept informed easily and centrally about your child's school activities. You can also easily and directly get in touch with the school for your own concerns.

You can use the platform on your mobile phone/tablet through the SchoolFox app or on your computer through our WebApp.

Google Play **App Store** **WebApp**

https://foxeducation.com/en/schoolfox/downloads

These practical **features** make it easier for you to participate in your child's school life:

💬 You will receive **messages** and updates directly **digitally** from teachers, so important information won't be lost on paper printouts or in the school backpack.

🖋 You reduce your communication effort by providing important feedback through **survey** responses, read **confirmations**, or a **digital signature**.

📝 Reporting **sick leave** or absences and the related confirmations are simply done through SchoolFox, thus avoiding lengthy calls and waiting loops.

⚠️ For urgent notifications such as school closures or illness cases, you will be informed via **emergency SMS** messages. This way, you receive the information even if your app notifications are inactive at that time.

📋 **Events** and **class schedules** will be presented to you in a manageable list and can be transferred to your personal calendar.

✅ Activate your SchoolFox account

● You will receive a personal invitation code from your school, which is valid only for you.

● Access SchoolFox as an app or WebApp and click on "Create account" on the login page.

● Now enter your invitation code here. (Note that the invitation code consists only of numbers and lowercase letters)

● Choose an email address and password for your account.

● In addition to a secure password, use an email address that you'll remember and have long-term access to. Access to this email address is needed to reset your password if necessary. For this reason, signing up with a phone number is not possible.

ⓘ Multiple parents can be connected to one school child – feel free to share the code with other parents.

Feel free to use SchoolFox for multiple siblings in parallel

Do you have more than one child communicating through SchoolFox in their school or class?

Of course, you can add multiple children to the same account. Just log in with the same credentials you use for SchoolFox (same email address and password) and enter the corresponding invitation code under "Add code."

Do you already know KidsFox, the little sister of SchoolFox?

We, the Foxies, want to accompany families throughout their entire educational journey as a safe communication tool.

This starts in the early years of childcare, where it's especially important to stay updated about the daily lives of the little ones. For this purpose, there's KidsFox, the communication app for daycare centres.

Do you have children who aren't yet of school age but you'd like to communicate with their educators in the same way as SchoolFox? Tell your daycare centre about KidsFox or refer your contacts to **sales@foxeducation.com.**

SchoolFox & KidsFox can also be used with the same account

If your daycare centre chooses KidsFox (or maybe already uses the app) and you're already registered with SchoolFox, you don't need to create a new account.

Just log in with the same credentials you use for SchoolFox (same email address and password) and enter the corresponding invitation code under "Add code."

Support Centre

Of course, we won't leave you alone in your continued use of our FoxApps. Our **support Foxies** are here for any questions, providing guidelines, explanatory videos, or personal contact.
